CITY OF WHITEHORSE- STATEMENT OF TREE SIGNIFICANCE

Property Address: 7 Amboina Ave Mitcham

Melways Ref: 49-A10

Survey Dates: 23.3.02 / March – April 2004

Tree No.	1	2	3
Tree Name	Eucalyptus cephalocarpa Silver Leaf Stringybark		
Tree Size	Mature		
Height	20m		
Spread	9m		
Significance*	L		
Age (years)	30-60		
Condition*	E		
Notes	Location- NW corner, frontage This tree is an excellent quality specimen		

* Significance: N-National, S-State, R-Regional, L- Local

* Condition: E- Excellent, G-Good, F-Fair, P-Poor, D-Dead

Criteria for Significance (please refer page x):

Historical significance	Rare/Localised distribution	Horticultural/Genetic Value	Particularly old
Curious growth form	Outstanding size	Outstanding Example of the Species	✓ Unique environmental contribution
Unique Location/Context	Aesthetic Value	Aboriginal Culture	

Statement of Significance:

This is an indigenous habitat tree of local provenance, that is part of regional vegetation linkages. It provides a vegetation corridor for local bird-life and fauna. It acts as a vegetation source upon which re-vegetation and regeneration of indigenous flora can occur. This tree is integral to the establishment of a sustainable urban and native landscape.

Photo(s):

CITY OF WHITEHORSE- STATEMENT OF TREE SIGNIFICANCE

Property Address: 520 Mitcham Rd Mitcham

Melways Ref: 48-K7

Survey Dates: 23.1.02 / 29 June 2005

Tree No.	1	2	3
Tree Name	Sequoia sempervirens Californian Redwood	Sequoiadendron giganteum Giant Redwood	Ulmus glabra 'Lutescens' Golden Elm
Tree Size	Mature	Mature	Mature
Height	19m	25m	17m
Spread	7m	7m	20m
Significance*	L	L	L
Age (years)	60-100 (estimated 65 years)	60-100 (estimated 65 years)	60-100
Condition*	G	G	G
Notes	Location- South of house, near Southern boundary A well formed tree of good symmetry, structure & health. The tree has a long safe useful life expectancy. Such trees of this size are uncommon within the municipality.	Location- North of house, near northern boundary It is a well formed tree of good form, structure and health. The tree has a long safe useful life expectancy. Such trees of this size and species are not common within the City of Whitehorse.	Location- North west of house, near Golden Elm Although such varieties of trees are very common in Melbourne and the City of Whitehorse, this is a stand out tree for the following reasons: it is large, mature and well structured. This is uncommon for this type because typically when they become large, the trees develop included bark unions at the forks between co-dominant stems. These forks are structurally weak and tend to split apart. There is very little of this occurring in this tree. It has a long safe useful life expectancy. Furthermore, it has great aesthetic attributes.
Tree No.	4		
Tree Name	Quercus acutissima Bristle Tipped Oak		
Tree Size	Mature		
Height	9m		
Spread	14m		
Significance*	L		
Age (years)	60-100 (estimated 65 years)		
Condition*	G		
Notes	Location- Between house and tennis court (west of house). It is almost certainly of the order of 65 years of age as is evident from annual increment analysis of a wound left recently by the removal of a low branch. It is of good form, structure and health.		

* Significance: N-National, S-State, R-Regional, L- Local * Condition: E- Excellent, G-Good, F-Fair, P-Poor, D-Dead

Criteria for Significance (please refer page x):

✓ 1,2,3,4	Historical significance	✓ 1,2,3,4	Rare/Localised distribution		Horticultural/Genetic Value		Particularly old
	Curious growth form		Outstanding size		Outstanding Example of the Species		Unique environmental contribution
	Unique Location/Context	✓ 1,3,4	Aesthetic Value		Aboriginal Culture		

Statement of Significance:

Tree 1- This tree conforms to three of the criteria required for significance listing. These are

- Historical significance – it is a prominent original feature in a type of garden which was once not uncommon but is now unusual to find in the area
- Aesthetic value – the tree is a very attractive specimen
- Rare/Localised distribution – It is uncommon to find good healthy large specimens of this type which have long safe useful life expectancies within private gardens in the City of Whitehorse.

Tree 2- This tree conforms to three of the criteria required for significance listing. These are

- Historical significance – it is a prominent original feature in a type of garden which was once not uncommon but is now unusual to find in the area
- Aesthetic value – the tree is a very attractive specimen
- Rare/Localised distribution – It is uncommon to find good healthy large specimens of this type which have long safe useful life expectancies within private gardens in the City of Whitehorse.

Tree 3- This tree conforms to three of the criteria required for significance listing. These are

- Historical significance – it is a prominent original feature in a type of garden which was once not uncommon but is now unusual to find in the area
- Aesthetic value – the tree is a very attractive specimen
- Rare/Localised distribution – It is uncommon to find good healthy large specimens of this type which have long safe useful life expectancies within private gardens in the City of Whitehorse.

Tree 4- This tree conforms to three of the criteria required for significance listing. These are

- Historical significance – it is a prominent original feature in a type of garden which was once not uncommon but is now unusual to find in the area
- Rare/Localised distribution – It is uncommon to find good healthy mature specimens of this type which have long safe useful life expectancies within private gardens in the City of Whitehorse.
- Aesthetic value – the tree is a very attractive specimen.

Survey Dates: 16.4.02 / March – April 2004

Tree No.	1	2	3
Tree Name	Eucalyptus cephalocarpa Silver Leaf Stringybark		
Tree Size	Mature		
Height	22m		
Spread	16m		
Significance*	L		
Age (years)	30-60		
Condition*	G		
Notes	Location- Frontage This tree is a good quality specimen		

* Significance: N-National, S-State, R-Regional, L- Local
 * Condition: E- Excellent, G-Good, F-Fair, P-Poor, D-Dead

Criteria for Significance (please refer page x):

Historical significance	Rare/Localised distribution	Horticultural/Genetic Value	Particularly old
Curious growth form	Outstanding size	Outstanding Example of the Species	✓ Unique environmental contribution
Unique Location/Context	Aesthetic Value	Aboriginal Culture	

Statement of Significance:

This is an indigenous habitat tree of local provenance, that is part of regional vegetation linkages. It provides a vegetation corridor for local bird-life and fauna. It acts as a vegetation source upon which re-vegetation and regeneration of indigenous flora can occur. This tree is integral to the establishment of a sustainable urban and native landscape.

CITY OF WHITEHORSE- STATEMENT OF TREE SIGNIFICANCE

Property Address: 14 Thomas St Mitcham (also 16 Thomas St)

Melways Ref: 49-A8

Survey Dates: 15.4.02 / March – April 2004

Tree No.	1	2	3
Tree Name	Quercus robur English Oak		
Tree Size	Mature		
Height	20m		
Spread	18m		
Significance*	R		
Age (years)	30-60		
Condition*	E		
Notes	Location- Common side boundary with 16 Thomas Street This tree is an excellent quality specimen		

* Significance: N-National, S-State, R-Regional, L- Local

* Condition: E- Excellent, G-Good, F-Fair, P-Poor, D-Dead

Criteria for Significance (please refer page x):

Historical significance		Rare/Localised distribution		Horticultural/Genetic Value		Particularly old
Curious growth form		Outstanding size		Outstanding Example of the Species		Unique environmental contribution
Unique Location/Context	✓	Aesthetic Value		Aboriginal Culture		

Statement of Significance:

The age and size of this tree provides an important contribution to the immediate landscape.

CITY OF WHITEHORSE- STATEMENT OF TREE SIGNIFICANCE

Property Address: 32 Vernal Ave Mitcham
Melways Ref: 48-K12
Survey Dates: 21.1.02 / March – April 2004

Tree No.	1	2	3
Tree Name	Eucalyptus cephalocarpa Silver Leaf Stringybark		
Tree Size	Mature		
Height	16m		
Spread	12m		
Significance*	L		
Age (years)	30-60		
Condition*	E		
Notes	Location- Frontage, east side boundary This tree is an excellent quality specimen		

* Significance: N-National, S-State, R-Regional, L- Local
 * Condition: E- Excellent, G-Good, F-Fair, P-Poor, D-Dead

Criteria for Significance (please refer page x):

Historical significance	Rare/Localised distribution	Horticultural/Genetic Value	Particularly old
Curious growth form	Outstanding size	Outstanding Example of the Species	✓ Unique environmental contribution
Unique Location/Context	Aesthetic Value	Aboriginal Culture	

Statement of Significance:

These are indigenous habitat trees of local provenance, that are part of regional vegetation linkages. They provide a vegetation corridor for local bird life and fauna. They act as a vegetation source upon which re-vegetation and re-generation of indigenous flora can occur. These trees are integral to the establishment of a sustainable urban and native landscape
